

# IA FileOptics - An Online Document Warehouse

## Electronic Document Archiving, Storage & Retrieval

Provides the power to quickly **capture**, **index**, **process** and **archive** both paper based and computer generated documents into folders. Once archived, documents are easily **retrieved** and **presented** for Viewing, Annotation, Re-printing and Emailing regardless of the original format.

- ✦ Member Documents
- ✦ Loan Documents
- ✦ Signature Cards
- ✦ Checks
- ✦ Statements
- ✦ Financial Reports

Is comprised of a comprehensive suite of software modules designed to create, update and maintain a single document warehouse of all files regardless of their original format.

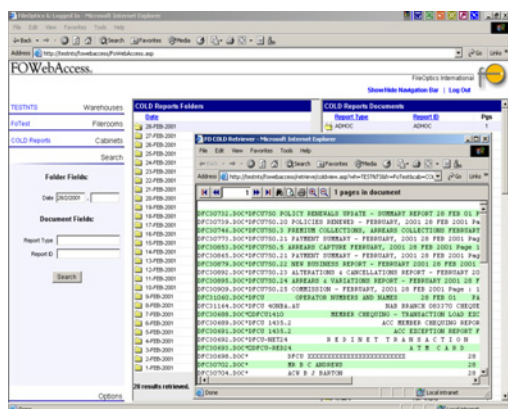

As opposed to competitive systems that require integration of a number of products to handle different file types.

FileOptics Single Product Architecture features:

- **Single Server Suite**
- **Browser enabled document viewer**
- **Single open SQL based database**

Is suited to a wide range of industries including banking & finance, utilities, construction, health, insurance and all levels of Government.

Incorporates a Client-Server architecture for use on a Microsoft Windows platform.

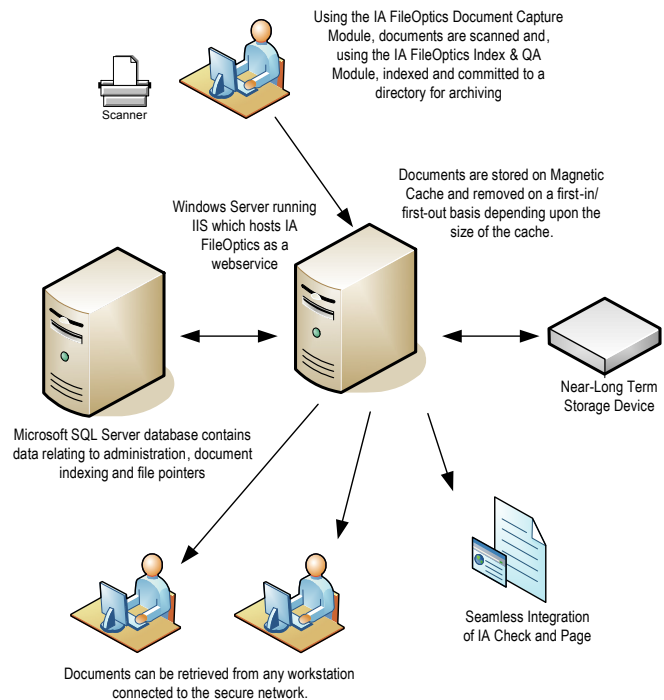

### System Features:

- ✦ Electronic Warehouse/File Room
- ✦ Cabinets, Folders & Documents
- ✦ High-speed Document Scanning
- ✦ Can archive any object file
- ✦ Single product architecture
- ✦ Client-Server design
- ✦ Uses SQL database
- ✦ On-line, Near-line and Off-line storage
- ✦ Email archive and retrieval
- ✦ Seamless IA Check/Page integration
